

LEEDv4.1  
Material Ingredient Reporting

**Manufacturer's Inventory for Pro Industrial™ Pro-Cryl Universal Primer:**

This shall serve as the Manufacturer's Declaration of the Chemical Inventory for the LEED Material Ingredient Reporting credit for the Pro Industrial™ Pro-Cryl Universal Primer product line, manufactured by The Sherwin-Williams Company.

For more information about Sherwin-Williams, please visit: [www.sherwin-williams.com](http://www.sherwin-williams.com). Or, for more information about the product, please consult its Product Data Sheet available at [www.paintdocs.com](http://www.paintdocs.com).

**Description of the Pro Industrial™ Pro-Cryl Universal Primer product line:**

The Pro Industrial™ Pro-Cryl Universal Primer product line consists of the following product bases which have the corresponding US GHS Classifications for its specific formulation. Bases are selected by customer to produce the desired level of gloss on the painted surface. Each base is normally tinted at the Sherwin-Williams store with one or more colorants to produce the final color of coating.

| Product Name                              | SW REX Series                      | US GHS Product Classification                    |
|-------------------------------------------|------------------------------------|--------------------------------------------------|
| Pro Industrial™ Pro-Cryl Universal Primer | B66W1310,<br>B66A1320,<br>B66N1310 | CARCINOGENICITY - Category 1A                    |
|                                           |                                    | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A |
|                                           |                                    | SKIN CORROSION/IRRITATION - Category 2           |
|                                           |                                    | SKIN SENSITIZATION - Category 1                  |

**Description of the Manufacturer's Inventory Assessment:**

In this assessment, we have disclosed the chemical content of all ingredients present at >1000 ppm (0.1%) in this product line base formulation, the respective GHS hazards associated with these chemicals, and their function/role. This inventory does not include colorants. In order to protect our confidential business information, specific quantities and CAS numbers are not reported for all chemicals. Additionally, chemicals with the same role have, in some cases, been aggregated into one line item.

When reviewing this document, it is important to consider that the potential hazards of the raw materials may not be relevant in the final, post-reacted product given that materials will often transform, be encapsulated, etc. As such, the information in this document shall not be utilized to make claims regarding product safety and/or to predict risk to end-users.

Information contained in this declaration has been verified by NSF as complying with LEED v4.1 Material Ingredient Reporting – Manufacturer Inventory criteria. Documents containing formula information were provided to NSF that represented each product line so that NSF could ensure accuracy throughout their review. These documents were exclusively shared with NSF to ensure business confidentiality. This information will be updated as necessary as reformulations or changes to GHS classifications occur. Additionally, this document will be internally audited by Sherwin-Williams annually to ensure correctness.

Any questions on this declaration should be sent to [sustainability@sherwin.com](mailto:sustainability@sherwin.com).
